

WHY SHOULD YOU CONSIDER SPAPILOT?

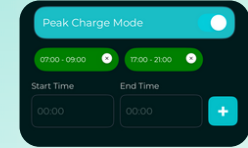

Cut Your Costs – Automatically

Spapilot automatically adjusts heating based on hourly electricity prices and your set limit, providing optimal rates without requiring market monitoring.

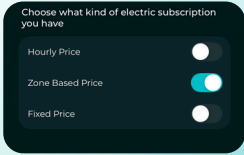

Protect Yourself from Price Spikes – Enjoy Peace of Mind

Spapilot lowers energy costs by automatically skipping heating during peak pricing hours, preventing unexpected electricity bills and providing peace of mind.

Works with Any Electricity Contract – Complete Flexibility

With Spapilot, you can select hourly, zone, or fixed pricing tailored to your subscription, ensuring optimal financial control.

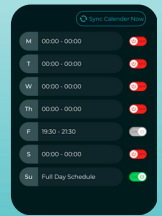

Total Control of Your Spa – Right from Your Phone

View the current temperature and weather conditions, with clear color coding for easy recognition. You instinctively know when it's time to bathe or warm up.

Bathe Whenever You Want – for the Lowest Possible Cost

With Spapilot's planner, you can schedule bathing times and optimize spa heating by considering electricity prices, limits, outdoor temperatures, and heat loss, ensuring your spa is ready while reducing electricity costs.

Always Up to Date – No Hassle

Spapilot automatically updates online, adding new features and security improvements without manual input, enhancing your system over time.

Always available to assist.

Our digital assistant, Zven, is consistently accessible within the app. Obtain answers to inquiries, receive energy-saving tips, and seek assistance with your system—precisely when you require it.

Simple and Secure Cost Control

With Spapilot's Basic planner, set your preferred temperature and maximum kWh price for efficient spa heating, balancing comfort and electricity costs.

Control Your Spa in Real Time – Wherever You Are

With Spapilot, you can control temperature, heating, pumps, and lamps remotely via your mobile phone, allowing for flexible adjustments to your spa based on plans or weather changes.
