EASY WATER ANALYSIS

for pool and spa

A product from

ZAVEPOWER
INNOVATIVE TECHNOLOGY

EASY WATER ANALYSIS IS PERFECT FOR POOL AND OUTDOOR SPA.

Game-changing benefits of owning an E.W.A smart sensor device.

With E.W.A the smart sensor works perfectly in your hot tub,spa or pool. If you have struggled with cloudy or green hot tub water, you know the secret to maintaining your spa, hot tub or pool is cleaner water, and this all comes down to testing the water and keeping track of changes. This is exactly what E.W.A smart sensor does for you!

No more hassle. Of course, you still need to make sure you do the basics of maintaining your spa, like cleaning the spa filter, clean, drain, and refill every 3-5 months. Ensure that you add enough water to keep your spa full and air out the spa cover at least once a week. Testing, tracking, and micro-dosing really is key to enjoying a clean, healthy spa.

Introduction

Effortless Hot Tub Care Has Arrived!

Maintain your hot tub in a pristine, crystal-blue condition while ensuring it's balanced and healthy.

E.W.A smart sensors deliver daily recommendations straight to your smartphone, providing valuable insights on chlorine and pH levels.

This guidance helps you maintain clarity in your water. You can enjoy your spa with confidence and ease, knowing that the water quality is just right.

With properly balanced water, you'll save time, reduce chemical usage, and avoid potential issues.

Discover the E.W.A – your ultimate solution for effortless spa care!

Imagine enjoying your outdoor spa without the stress of constantly checking water quality. The E.W.A smart sensor does the work for you, monitoring your spa's water quality around the clock.

With real-time data analysis, our innovative app keeps you informed, sending intelligent alerts straight to your phone about the exact chemicals needed to maintain crystal-clear water. No more guesswork – you'll know exactly when to take action!

Plus, with the convenience of ordering your chemicals directly online from your preferred supplier, you'll always be stocked up and ready for relaxation.

Best of all, you don't need any prior knowledge or experience to use our sensor. It's designed to be easy and secure, making spa care a breeze for everyone.

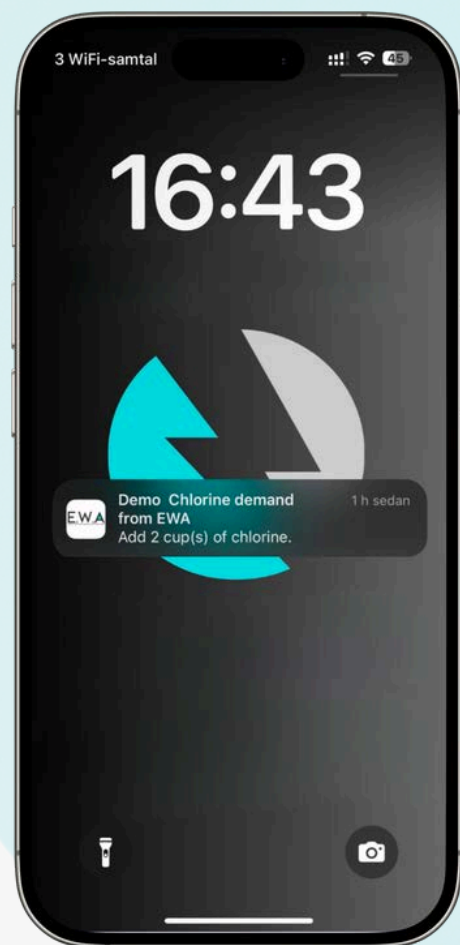

SMART NOTIFICATIONS

The app will deliver smart notifications to your phone when action is required. For instance, if your spa water test indicates a need for more chlorine, you will receive a notification suggesting to add 1 g of chlorine to your spa promptly.

These micro-doses help maintain your water's balance and health, preventing the growth of bacteria and algae. There's no need for installation; simply place the device in your hot tub or spa and complete the straightforward setup process on the app.

Our sensor is crafted to simplify your experience. It measures water quality 15 times a day, ensuring you are consistently informed with the most accurate results.

Monitor the fluctuations of your water quality over time by viewing daily, weekly, and monthly graphs. Our dedicated team is here to support you and ensure that owning a spa becomes a delightful experience once more.

Which way do you prefer?

- Is it a sunny yellow, a zesty orange-yellow, or a soft light orange? Perhaps it's a fabulous yellow-orange hybrid!

or

E.W.A. Probe – Precision Water Monitoring for Your Spa

The E.W.A. probe is the ultimate solution for effortless water quality management in your spa or swim spa. Designed with cutting-edge technology, it continuously monitors pH, ORP (oxidation-reduction potential), and temperature, providing real-time data directly to your smartphone.

Key Benefits:

- **Unmatched Accuracy:** Get precise readings for optimal water balance, ensuring a safe and enjoyable spa experience.
- **Convenient Monitoring:** Check your water quality anytime, anywhere, with the E.W.A.
- **Easy Maintenance:** No more guesswork—receive timely alerts when adjustments are needed.
- **Durability & Reliability:** Built to withstand spa or pool conditions with long-lasting sensor technology, reducing the need for frequent replacements or recalibrations.
- **Universal Compatibility:** Works seamlessly with any spa, swim spa or pool brand, making it the perfect upgrade for any setup.

With E.W.A., maintaining perfect water quality has never been easier. Enjoy peace of mind knowing your spa is always ready when you are.

Upgrade your spa or pool experience today with E.W.A. and enjoy smarter, stress-free water care.

Easy installation

Connect the probe to the control unit, and then connect the unit to electricity. Depending on which version you have. Connect the unit to your Wi-Fi. (Balboa, Gecko, or pool).

4.

Type in <https://ewa.proa.life> in your browser.
Set up your account and enjoy.

General Terms and Conditions for EWA Water Analysis Product

1. Area of use

EWA is a water analysis product designed to measure and monitor water quality in private and commercial pools. The product is not intended for any other use and should be handled according to the specifications provided in the user manual.

2. Installation and Maintenance

The product must be installed and maintained according to the manufacturer's instructions to ensure proper operation. Any damages or defects that occur due to improper installation, use, or maintenance are not covered by the warranty.

3. Limited Liability

EWA is provided to improve the maintenance of water quality, but the manufacturer is not responsible for the consequences of any incorrect readings. The customer is responsible for regular monitoring and maintenance of the pool.

4. Warranty conditions

The manufacturer provides a limited warranty on the EWA product, as specified below.

Warranty terms for EWA Water Analysis Product

1. Warranty period The warranty is valid for 24 months from the date of purchase. Proof of purchase, such as a receipt or invoice, is required for the warranty to apply.

2. Scope of the warranty

The warranty covers:

- Defects in materials and workmanship.
- Free repair or replacement of defective components.

The warranty does not cover:

- Wear parts or components that require periodic replacement due to normal use, e.g. the probe
- Damage caused by incorrect installation, careless handling, changes to the product, or external influences such as moisture, extreme temperatures, or chemical substances.

3. Warranty procedure

To use the guarantee, the customer must:

- Contact the manufacturer's customer support and describe the problem.
- Provide proof of purchase and other necessary information.
- If the manufacturer determines that the product is covered by the warranty, instructions are sent for how to repair or replace.

4. Limitations in the Warranty

The warranty is limited to repair or replacement of defective components. The manufacturer is not responsible for indirect damages, such as lost income or costs incurred as a result of product defects.

5. Refund

In cases where repair or replacement cannot be offered, the manufacturer reserves the right to offer a refund corresponding to the current value of the product.

6. Contact information for Warranty matters
